Universities and employers look for more than just results. They also want to see students who are genuinely interested in the subject area and who can manage their time to go beyond what they study in the classroom. To help you with that, this booklet has ideas for super-curricular enrichment activities for subjects and careers across college. These are designed that you can do these from home and even under the current restrictions.

In an inspiring, informative conversation with TED Curator Chris Anderson, Thrun discusses the progress of deep learning, why we shouldn't fear runaway AI and how society will be better off if dull, tedious work is done with the help of machines. "Only one percent of interesting things have been invented yet," Thrun says. "I believe all of us are insanely creative ... [AI] will empower us to turn creativity into action."
